Lab Work 5

Case Study: The Registan Travel Website

Instructor	Dr. Nourchen Moumni	**Total**	20 marks
Chapter	3 · CSS & CSS Frameworks	**Duration**	1 week
Work mode	Individual	**Deadline**	_____
Student name		**Student ID**	

1. The case

Registan Travel is a small tour agency in Tashkent (a fictional company). The owner, **Mrs. Dilnoza Rakhimova**, wants a simple website with two pages: a **Home** page that shows her tours and a **Booking** page where visitors send a request. There is no database: the booking is only checked in the browser and confirmed on screen. She told you:

> *"Most customers find us on their phones, so it must look good on a small screen first."*
>
> *"When someone books, show the total price straight away, before they send the form."*
>
> *"My nephew says Bootstrap is faster. Can you show me the difference?"*

2. Brand and content

	Colour	Use it for
	Registan Night `#0B1F4B`	Header, footer, headings, buttons
	Tile Gold `#E0A526`	Hover states, badges, active menu link
	Brick Red `#C0392B`	Errors and required stars
	Sand `#FAF6EE`	Page background

Headings: `Georgia, serif`. Body: `Arial, sans-serif`, 16px. Breakpoints: tablet **768px**, desktop **1200px**. A coloured box or an emoji is fine instead of photos.

Tour	City	Days	Price (USD)	Badge
Old Tashkent Walk	Tashkent	1	35	Best seller
Registan & Gur-e-Amir	Samarkand	2	120	Top rated
Khiva Itchan Kala	Khiva	3	210	New

CARD 2
CARD 3
FOOTER

Tablet (768px – 1199px): two cards per row.

3. Tasks

Folder: `index.html`, `booking.html`, `index-bootstrap.html`, `css/style.css` (one stylesheet for both pages), `js/main.js`.

Part A · Home page with hand-written CSS40 marks

- **Header** fixed at the top, logo left and menu right with **flexbox**. The page content must not hide under it.
- Menu links in **LVHA** order; gold background on hover; the current page link has a gold bottom border.
- **Hero** with a background colour or gradient, centred text and a button that shrinks slightly when pressed.
- **Three cards** (`div.card`) with the badge in the **top-right corner** (`position: relative` / `absolute`). A card rises on hover.
- **Mobile first**: 1 card per row on phones, 2 from 768px, 3 from 1200px.
- Use `box-sizing: border-box`, at least one `<span>`, one ID selector and one group selector.

Part B · Booking page with JavaScript30 marks

- Fields: name, email, tour (`<select>` with the three tours), number of travellers (1–12), date, and a submit button.
- Labels above fields, fields 100% wide, a clear `:focus` style, and a red star after required labels with `::after` (not typed in the HTML).
- **Live price**: when the tour or the number of travellers changes, show for example “Total: 3 × 120 USD = 360 USD”. Groups of 5 or more get **10% off**.
- **Validation** on submit: no page reload; if the name is empty or the email has no `@`, show a red message and highlight the field. Otherwise show a green confirmation with the name and total.

Part C · Bootstrap version10 marks

Rebuild the Home page as `index-bootstrap.html` with Bootstrap 5 (navbar, grid `container` / `row` / `col-*`, cards). Keep the same 1 / 2 / 3 card layout and the brand colours. Write one sentence comparing the amount of CSS you wrote in Part A and Part C.

Part D · Client bug reports20 marks

For each bug: name the cause with the correct CSS term and write the corrected code.

Bug 1 *"Visited menu links do not turn gold when I hover."*

```
nav a:link    { color: white; }
nav a:hover   { background: #E0A526; }
nav a:visited { color: white; background: none; }
```

Bug 2 *"The badge is in the corner of the whole page, not the card."*

```
.card  { padding: 16px; border-radius: 10px; }
.badge { position: absolute; top: 10px; right: 10px; }
```

Bug 3 *"On my laptop the third card drops below the other two."*

```
.card { width: 33.33%; float: left; padding: 20px; border: 1px solid #ddd; }
```

4. Submission and marking

Submit one .zip named `Lab5_StudentID_Name.zip` with the project folder and a short PDF containing two screenshots (phone and desktop), the Part C sentence and the Part D answers.

Part	Marks	Full marks when…
A · Home page	40	Matches the wireframe at all widths; fixed header, badge and media queries work
B · Booking page	30	Form styled; star from `::after`; correct total with discount; validation works
C · Bootstrap	10	Same layout and colours with the Bootstrap grid
D · Bug reports	20	Cause named correctly and working fix for each bug
Total	**100**	

Deductions: inline styles or `<style>` blocks in the HTML **–5**; `!important` **–2** each; code you cannot explain in the viva scores **0** for that part.
